## OUTMATCHED BY NO ONE. WALTHER'S Q4 STEEL FRAME

Walther continues their tradition of superiority with a handgun designed specifically for those who only buy the best and nothing less. This is the ultimate representation of high-class performance in a conceal carry package that just can't be found anywhere else. The new Walther Q4 Steel Frame.

A feat in firearm engineering that simply must be felt to be believed, the Q4 Steel Frame will surpass all expectations with its unrivaled accuracy and performance. Its steel frame – precision machined from forged steel – improves ergonomics with Performance Duty Grip Texture, Duty Optimized Beavertail, full length picatinny rail and recessed ambidextrous slide release.

A testament to Walther's enduring legacy of excellence, the Q4 Steel Frame delivers peak performance when you need it most. Walther's the Quick Defense Trigger is a legacy of its own and it is now available in a modern all steel striker fired gun. The Duty Optimized Beavertail provides the shooter increased grip height on the pistol. Optimized for duty retention holsters, providing clearance for retention hoods most used in Law Enforcement. This beavertail design also enhances comfortability during concealed carry. The smooth, rounded design allows reduced irritation when carrying appendix IWB. This design also reduces the amount of print while carrying concealed. The Q4 Steel Frame is precision machined to create a superb balance in hand. The weight distribution of the steel frame drastically reduces recoil to improve shooter performance, ultimately contributing to overall efficiency. The Q4 Steel Frame features Performance Duty Texture, developed by Walther to provide a premium, yet functional grip. This Performance Duty Texture provides an aggressiveness to maintain proper grip performance. But, with its tetrahedron design, it is non-abrasive, providing no irritation to the skin or clothing of the user.

Two variants are available. The duty version with PS sights and an Optic Ready model with all black serrated target sights. The scope of delivery includes a magazine loader, two 15-round magazines and the attractive Q5 case.

The Q4 Steel Frame can be ordered now and it will start shipping in spring 2020.
